

Simone Casagrande

simone.casagrande@gmail.com

London, United Kingdom

Summary

At the end of 2012 I left Italy and I'm actually living in London working in the role of Android developer for Mail Online (Daily Mail DMGT). In addition to my passion for mobile world, I have got a strong passion for algorithms because I think that problems have to be solved instead of getting only discovered. I consider myself to be a very ambitious and dynamic person with a great curiosity for all those things which involve new technologies with a massive effect on people life. My portfolio also includes Android mobile apps for healthcare, entertainment, games, school, geolocalization and utilities.

Experience
